Ref: Building of the Point Blanche Prison

Dear Chairman Mr. Paternotte,

In a press release on Koninkrijk.nu I read that this week, on Friday October 30th, 2020, the permanent committee for Kingdom affairs will be discussing the troubling humanitarian situation at the Point Blanche Prison. A problem which has remained unresolved in my country for quite some time which seems to have no proper solution in the foreseeable future.

It's with the above in mind that I address myself to your committee with the request to please consider the following proposals so that we can all see the building of the Point Blanche prison become a reality for the country Sint Maarten during your deliberations on Friday October 30th 2020.

Proposal 1:

1. A project management team is put together by the Dutch Government to oversee the planning and building of the prison in Sint Maarten.
2. The project team will be under the auspices of the BZK ministry in the Netherlands and by extension the Dutch representative in Sint Maarten.
3. The funding should be taken from the presently unallocated trust fund monies made available to the country.

Note: It could be argued that the present state of the prison is not a direct result of hurricane Irma, however, it should also be considered that the same can be stated for the Sanitary landfill. Yet some 25 million dollars has been made available in phase 1 and some 35 million in phase 2 for the rehabilitation and closing of the landfill. I truly don't understand the rationale in deciding to fix a landfill instead of a prison where there are direct daily issues regarding human rights and safety.

P.B.A.

Building of the Point Blanche Prison / 2

Proposal 2:

1. Collaborate with the present Minister of Justice and her team from the UNOPS to rehabilitate the existing prison bringing it at least to acceptable standards or constructing a new prison.
2. The project team will be under the auspices of the BZK ministry in the Netherlands and by extension the Dutch representative in Sint Maarten. The Ministry of Justice will appoint a representative to form part of the project team.
3. The funding should be taken from the presently unallocated trust fund monies made available to the country.

Note: A case can be made for the above as the government is being supported by UNOPS in preparing the plan for the prison. By the way, in contentious landspakketen that is exactly what the Dutch government was advocating, to work with UNOPS on the prison on St. Maarten.

I believe either of these proposals will be beneficial to our country and I hope we can start making some headway moving forward in getting the prison of the country up to par so the human rights and conditions of the inmates are at no less than the acceptable standard required by the Kingdom. A positive advice to your government will go a long way I believe.

Lastly I strongly believe that as countries no matter our size we must find common grounds to work with each other in a manner of understanding, unity and cooperation in the interest of all involved.

Respectfully yours,

MP Claudius Buncamper
Faction leader United St. Maarten Party

MP Akeem Arrindell
Member USP party
